

SMARTCHAMBER™

The SCS SmartChamber enables the use of 1-MCP on fruit and vegetables without the need of constructing treatment rooms. The five sided, motorized curtain is a practical and cost effective solution for a temporary treatment period.

With a push of a button, the roof moves allowing for various stack heights. Once set, a remote control keychain, similar to door locks for an automobile, is used to control up and down movement of the side walls. Auxiliary switches are also provided to start a fan and turn on a light. Fixed switches and indicator lights are also provided.

The framework is entirely assembled during the fabrication process at the factory. All corners and attach points are labeled and mapped for an easier and faster installation process.

A typical chamber can weigh approximately 1500 to 2500 lbs. Care must be taken to insure that the structure above the chamber has the capability of holding the weight.

- ▣ Custom Made Sizes
- ▣ Durable 14 mil material
- ▣ Airtight to treatment standards
- ▣ Scrim reinforced material
- ▣ Battens inside for tight ft3 requirements
- ▣ Improved floor seal
- ▣ Industrial gear motors with heavy duty chains
- ▣ Proven and Reliable in the field
- ▣ Tracks side to side to next treatment
- ▣ Voltage: 120-480 volts
