

MCA Pallet Covers

Storage Control Systems, Inc. has a new simple system for micro controlled atmospheres. Use this simple bag method over your pallet of produce to extend the life by modifying only the atmosphere inside each individual pallet of produce.

The aluminum pan seals the bottom of the pallet, the cover fits over the stack of produce, then simply tape the bag to the pan.

This method is very cost effective and suitable for various size growers. Once sealed, these pallet stores are kept in your cooler and under a controlled atmosphere until the product is ready to market.

Oxygen and Carbon Dioxide control can be monitored via external tubing connected to the pallet using quick-connect fittings. This allows the tubes to stay in place, while the pallet is removed from the cold store, and then available for the next sealed pallet to go into that store location.

Control can be accomplished manually or by a complete computer control system that can sample up to 100 pallets. Setpoints are programmable for each pallet.

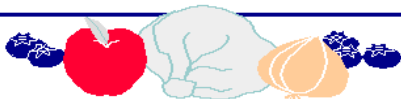

- 5 covers per roll
- Standard size is 48" x 53" x 168"
- 8 mil plastic

- High Grade Aluminum Pan
- Accessories: pressure relief, quick-connect
- Fast and Cost Effective MCA

Storage Control Systems has long been a supplier and manufacturer of Controlled Atmosphere equipment. In business since 1982, we have a variety of alternatives for your CA needs. Whether it be Permea Nitrogen Generators, GCS Instrumentation including gas analyzers, Van-Amerongen Carbon Dioxide Scrubbers and VPSA Oxygen Absorbers.

We have the system to fit your needs, Call 800 487-7994 for a facility proposal.
