

SCS RH4090 RH SENSOR

Maintain your rooms with high accuracy using our GC RH4090 relative humidity sensor. Compatible with SCS LiveView, this sensor allows the grower to accurately measure humidity levels wherever the probe is placed. This means a grower isn't tied in to where the box is installed, and can correct problem areas as they arise, if need be. Log into the web or app interface to view live or past readings from the cloud, or a graph to assess trends.

Increased plant awareness can increase yields and plant health easily. The knowledge gained with our sensors & controllers will allow the grower to repeat processes with assurance.

FEATURES

- ▣ Relative Humidity Working Range: 0-80%
(RH 0-100% Output Range)
- ▣ Temperature Output Range : -40-176°F
- ▣ Tethered Probe for Dynamic Placement
Remotely View Current or Historic Readings
from the Cloud with SCS LiveView
